COMPANY PROFILE

INTRODUCTION

At Hind Group, we enable our customers to build high quality products with utmost consistency through our systematic Lean approach in manufacturing. As a global service provider, we have acted as a catalyst for industrial growth since the inception

1990

Established in year 1990

With Capacity – 100 mt / month
Current Capacity – 1500 mt / month

1996

Reliance Industries Limited - Channel Partner –Industrial Fuel

Yearly off take: 48,000 mt./ Year

2008

Started Manufacturing of Grounded Calcium Carbonate -

With Capacity – 300 mt / month
Current Capacity – 10000 mt / month
Expansion Stage – 11000 mt/month

2019

Captive Solar Plant

Capacity – 4.00 MW
Planning to expand – 8.00 MW (This FY)

All Our Products will be NET ZERO CARBON EMMISION

2026

Captive Solar Plant

Capacity expand – 8.00 MW (

All Our Products are NET ZERO CARBON EMMISION

OUR MISSION

We are committed to provide the best in class spectrum of products and integrated services to all our clients. At HIND we embrace innovation and harness technologies with the aim to build a solution that continually meets our client requirements and helps in achieving sustainable growth.

OUR VISION

Our vision is to be recognized as a market leader by continuously tapping new technologies, product innovation with manufacturing excellence by maximizing the use of domestic resources in order to substitute imports.

GROUP OF INDUSTRIES

HIND CHEMISALES	HINDUSTAN CHEMICALS	VISHNU VIVEK MARBLE INDIA PVT. LTD	RAJASTHAN Chemical Industries	HIND Traders	HIND Logistics	HIND CHEMTRADE

COMPETITIVE ADVANTAGE

Mining To Micronizing . Captive Power Plant which give us edge over our competitors leaving net zero carbon emission

01 Bespoke Solutions

Tailored products and services to meet specific client requirements

02 Strong R&D and Innovation Focus

We continually invest in research and development to stay ahead of market trends, improve product quality, and introduce new, cutting-edge technologies.

03 Customer-Centric Approach

Dedicated Customer Support: A team of professionals focused on client satisfaction.

Collaborative Development: Working closely with clients to co-create solutions that drive mutual success.

04 Sustainable and Ethical Practices

Green Manufacturing: Commitment to become net ZERO carbon emission.

Ethical Practices: Adherence to ethical labour and sourcing practices.

05 State Of Art Laboratory

Our laboratory is equipped with all the major testing equipment's including PSA and Abrasion Testers.

06 Ceramic Line Ball Mill

Our Products are grinded using ceramic media which results in :

A) Consistency of tone and colour
B) Low abrasion values
C) Better product life cycle (Due to low Iron content)

07 Mining

Our mine’s operation will start in next 2 months which will result in further consistency in quality and reduce cost.

FUTURE OUTLOOK

20%

Capacity Expansion

We are extensively expanding our capacity with latest machines and upgrading our existing machine with latest technology to increase our Operating Margins % .

5%

Reduced Cost

We are extensively working on R&D to automate our production processes and packaging line which will also eliminate human intervention, hence reducing cost.

90%

Solar Power Plant

Currently we are catering 90% of our power demand through SOLAR POWER . We are in line with European Union target to be net zero carbon emission by 2030 by expanding out SOLAR Capacity .

HIND GROUP

CORPORATE SOCIAL RESPONSIBILITY

Activities focusing on **education, water consumption, zero wastage** & **Plantation drive** by integrating sustainable practices, supporting communities, and promoting awareness.

Education

- Organizing workshops & training sessions aimed at upskilling youth and adults in specific fields, like digital literacy, technical skills, and entrepreneurship, which will empower them for future job markets.

Health & Hygiene

- All workers and employees are covered in ESIC scheme or adopted by ESIC hospital under ”Company Adoption Program”

Water Conservation

- Committing to reduce the company's own water footprint by installing water-efficient technologies in factories and offices, recycling wastewater, and setting water reduction goals.

Zero Waste & Tree Plantation

- Implementing a zero-waste policy in company operations by reducing, reusing, and recycling materials. We have zero discharge policy from our plant.
